Job Opening: Research Analyst, National Commission on Energy Policy

The National Commission on Energy Policy (NCEP) has an immediate opening for a research analyst to work on a variety of projects related to climate change, oil security, and energy infrastructure. The research analyst will analyze legislative proposals on climate change and will support projects associated with global energy markets and the siting of large energy projects. The applicant must have a Master’s degree in public policy, economics, or a related field. The applicant should have strong written and oral communication skills, should have experience with spreadsheet packages, and should be comfortable with quantitative data analysis. Work experience on climate or energy issues is a plus. The salary range is $50,000 - $60,000 per year and the position includes an excellent benefits package.

The National Commission on Energy Policy is a bipartisan and multi-stakeholder group of energy experts that promotes policy approaches that enhance American national security, strengthen the U.S. economy, and protect the global environment and public health. NCEP is a project of the Bipartisan Policy Center. For more information, visit www.energycommission.org

Interested applicants should send a cover letter and resume to: ehawkes@energycommission.org
